Innovations Session N°13

Producers' and SMEs innovations in agroecology for sustainable agrifood systems

INNOVATIONS
SERIES

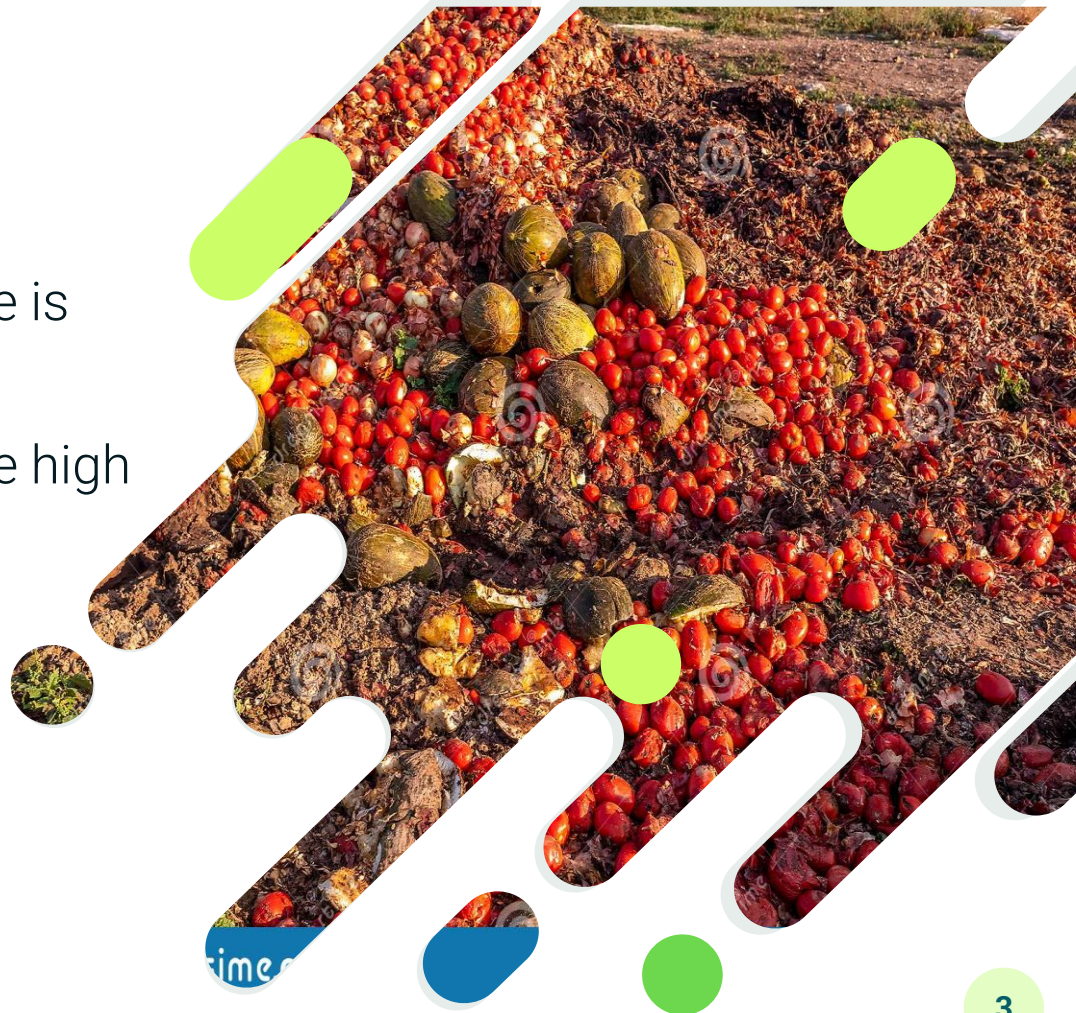

Black Soldier Fly

Eco-Friendly Poultry Feed

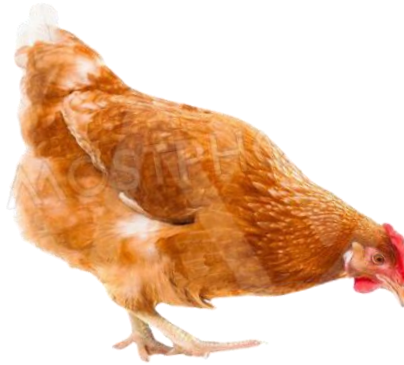

THE PROBLEM

- 10,000 tonnes of organic waste is generated every day
- Protein accounts for 60% of the high feed cost.

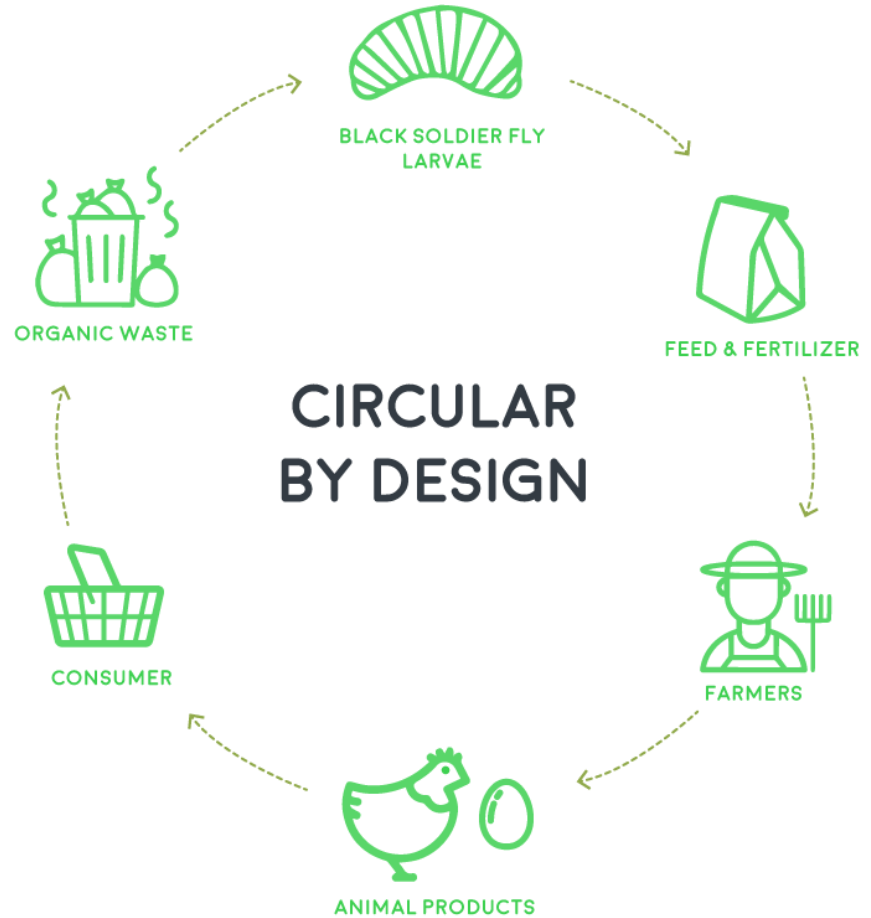

THE SOLUTION

AgriLife uses black soldier fly larvae to convert organic waste into affordable, sustainable and nutritious animal feed as well as organic fertilizer.

The Product

Revenue Model

AgriLife

Poultry Farmers

\$1/KG

Target Market

**Total:
3.7 Million
Poultry Farmers**

**Target:
185,000
Poultry Farmers**

Carbon Footprint

REDUCE

100+ Metric tons

Of CO₂ - Emissions per year

CURRENT SOLUTION:

Produce

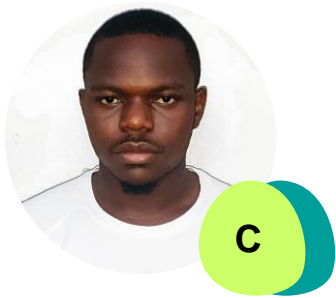

1.65 ton of CO₂ / ha

AgriLife

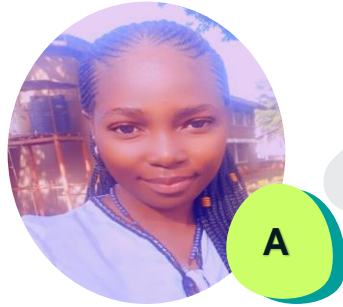

Reduce

2 .94 MT CO₂ / ton

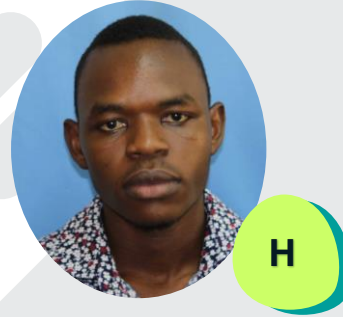

Team
