Performance of Red Diamond “Seaweed Biostimulant” on Turf

The aim of this study was to assess the efficacy of fertilizers on turf in the United Kingdom in 2022 after repeated applications of Red Diamond “Seaweed Biostimulant” at 2 application rates compared to selected other commercially available products.

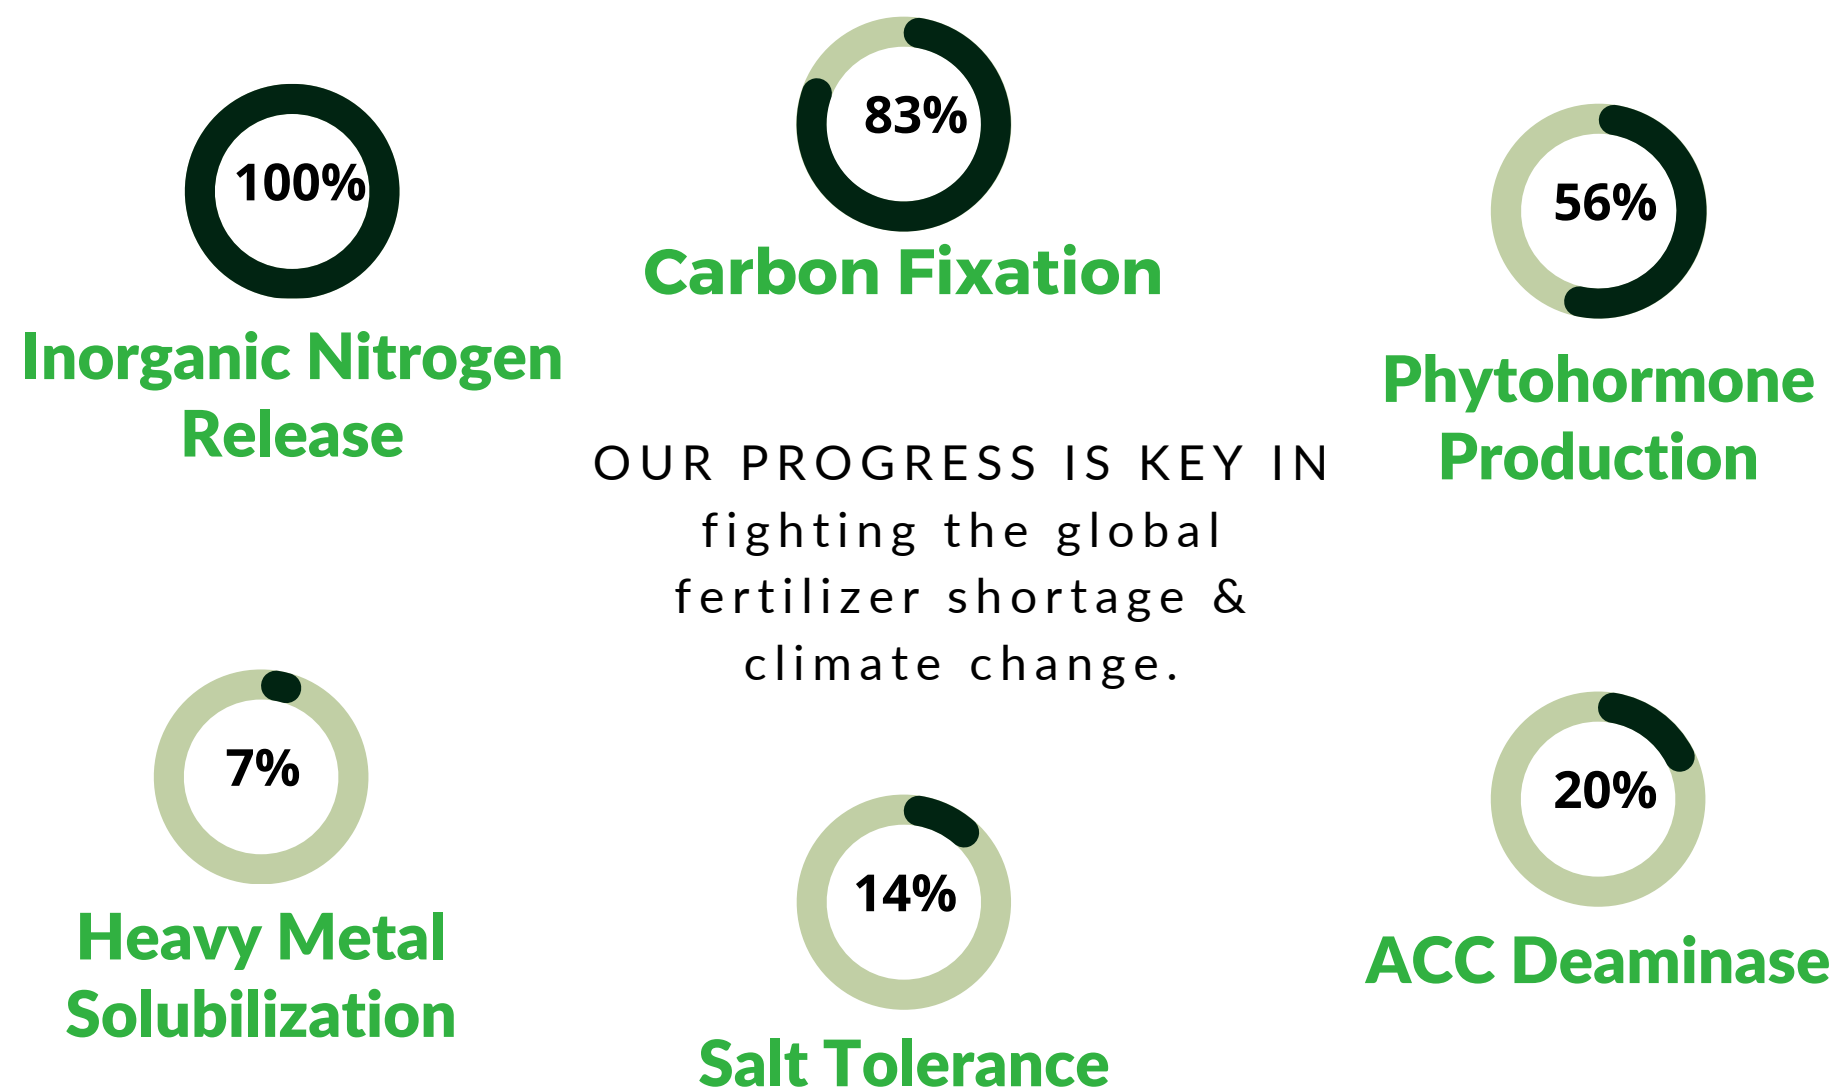

The trial was of a randomised block design on each surface type consisting of 5 treatments, with 4 replicates plots. The trial was conducted on lawn turf (comprising 6 species), growing on a sandy clay loam soil.
